your power is our priority

customer service

the Alba Power team is flexible, ambitious, friendly and approachable. We have a partnership approach to working with our customers, whilst being fully accountable for our work we do for them.

excellence

to be the leader in the market, we need to set the bench high and ensure we lead by example. Operating in a serious market means we must always prioritise quality above everything else. We trust our people to ensure quality is so high that our customers always have peace of mind.

one team

our team brings with them and develops at Alba Power, superior knowledge, experience and expertise in our field. No one part of the business is responsible for our success – we work together to give our customers the very best we can.

open and honest

to deliver exceptional customer service, responsively, as one team and to a high standard, there is only one way to behave and communicate. Whilst always respecting each other, we are open and honest at all times, getting to the point and getting to the customer solution, efficiently.

problem solving

we see our job as finding a solution, whatever the problem and we use the experience from across our team as well as innovative thinking to do this. We understand the critical nature of the industries and sectors our customers are working in and we value responsiveness and do what it takes to meet our customers' needs.

Alba Power is the worldwide expert in aeroderivative/ industrial gas turbines, power turbines, controls and rotating equipment support and aims to increase the life of its clients' turbines. Our headquarters are in Aberdeen, Scotland, in a 14-acre facility, incorporating a new, custom-built gas turbine workshop and stores complex, supported by liquid/gas/dual-fuel facilities. We also have an operation in Houston to further enhance our global capabilities, offering services to a customer base that includes North and South America and the Middle East. We have extensive industry experience, coupled with strong values around customer service, problem solving and a passion for excellence, delivered through a strong team culture that is open, straight-talking and honest. This provides our clients across the globe with unprecedented levels of service and responsiveness due to our 24/7 service, giving them confidence and peace of mind, as well as cost and overhead efficiency.
