Alba Power is the worldwide expert in aeroderivative/ industrial gas turbines, power turbines, controls and rotating equipment support and aims to increase the life of its clients' turbines. Our headquarters are in Aberdeen, Scotland, in a 14-acre facility, incorporating a new custom-built gas turbine workshop and stores complex, supported by liquid/gas/dual-fuel facilities.

We also have an operation in Houston to further enhance our global capabilities, offering services to a customer base that includes North and South America and the Middle East. We have extensive industry experience, coupled with strong values around customer service, problem solving and a passion for excellence, delivered through a strong team culture that is open, straight-talking and honest. This provides our clients across the globe with unprecedented levels of service and responsiveness due to our 24/7 service, giving them confidence and peace of mind, as well as cost and overhead efficiency.

Customer Service

Our team at Alba Power are flexible, focussed, friendly and approachable. We pride ourselves on having a partnership approach when working with our customers, whilst being fully accountable for the service we provide and offering world class customer service at all time.

Open and Honest

To deliver exceptional customer service, responsively, as one team and to a high standard, there is only one way to behave and communicate. Whilst always respecting each other, we are open and honest at all times, getting to the point and getting to the customer solution, efficiently.

Problem Solving

Our job is to find a solution whatever the problem and using our team's experience and innovative thinking we will always aim to provide the correct outcome. We understand the critical nature of the industries and sectors that our customers operate in and we value responsiveness and do what it takes to meet our customers needs.

Industry Excellence

To be the leader in the market, we need to set the benchmark and ensure we lead by example. Operating in a serious market means we must always prioritise quality above everything else. We trust our expert team to deliver the highest of quality at all times, ensuring that our customers always have peace of mind.

One Team

The award winning Alba Power team have hundreds of years of industry knowledge, experience and expertise. No one part of the business is responsible for our success – we work together to always ensure that we give our customers the very best in efficiency and service at all times.

Flexible & Responsive

As the leading global independent, we always aim to offer a flexible and responsive approach with all of our clients. The Alba 24/7 service gives an unrivalled and unprecedented level of responsiveness across our industry. Our ability to replace turbines through our own stockholding ensures reduced downtime and significant cost management benefits.
